Testimonial of Chief Strategy Officer (CSO) towards the cause "PRESCRIPTION IN CAPITAL LETTERS'

**Ms. Sugandh Ahluwalia**

I appeal to you to extend your support in making this drive successful, as at the end of the day we all are here for the patients, and patient satisfaction is very important to us and we believe that it facilitates process improvement as well as patient safety at large.

Keeping in mind the laws that will be put in place in future, regarding medication prescription in CAPITAL letters, it is also our social responsibility to comply to them. Above all, I am very happy to see how all the doctors have given positive testimonials in favour of this cause, it is very motivating for other members of the medical fraternity if such senior doctors comply and extend their support.

Thanks

Ms. Sugandh Ahluwalia

Manager Quality

Indian Spinal Injuries Centre

Testimonial of Dr. Bhushan Nariani towards the cause "PRESCRIPTION IN CAPITAL LETTERS'

Dr. Bhushan Nariani

(Sr. Consultant Cum Chief of Joint Replacement Services)

Prescription of medicines to patients are the most important aspects of patient's welfare. In order for it to be successful it is needed that the name of the medicines and doctor's advice to the patient is legible. Hence prescribing medicines in capital letters is a great way of achieving the same. I appreciate this move and urge mt fellow colleague to comply to it for benefit of the patients at large.

All the very best and have a great day.

With regards

Dr. Bhushan Nariani

Manager Quality

Indian Spinal Injuries Centre

Testimonial of Medical Director towards the cause "**PRESCRIPTION IN CAPITAL LETTERS**'

Dr. H.S. Chhabra

It is a great initiative by Indian Spinal Injuries Centre to spread awareness about prescriptions

being written in capital letters by our doctors.

As we all know illegible prescriptions by doctors may lead to serious implications. This drive is

directed to reduce prescription errors as well as to bring uniformity in prescription. Writing in

capital letters would alleviate the problem of misinterpretation and hence wrong medications.

I assure full compliance and support from our team towards the drive.

With regards,

Dr. H.S.Chhabra
